

LiveContent 2.0

<http://creativecommons.org/projects/livecontent>

© ⓘ Except where otherwise noted, content licensed under <http://creativecommons.org/licenses/by/3.0/>

LiveContent 2.0 goals:

- "Autocurating" open content feeds from sites like Flickr
- Developing a daily LiveContent build to be hosted at Fedora Project Site
- Encouraging API standardization and addition of CC-powered projects to the Content Directories (http://wiki.creativecommons.org/Content_Directories)

Further information at <http://creativecommons.org/projects/livecontent>

Creative Commons provides free tools that let everyone easily mark their creative work with the freedoms they want it to carry. With Creative Commons licenses, you keep your copyright but share your creativity. Creative Commons is a nonprofit organization, and everything we do – including the software we create – is free. Visit www.creativecommons.org for more information about us and how to support the work we do.

LiveContent 2.0 is a LiveDVD and can boot directly from the DVD without installing the software on a computer. The LiveDVD contains:

- Fedora 8, a free, open source GNU/Linux-based operating system
- Creative Commons-licensed content such as audio, video, image, text and educational resources from organizations like Flickr, Jamendo, blip.tv, Wikimedia Commons
- Free, open source creativity, productivity, and entertainment applications like OpenOffice.org, Inkscape, and The GIMP
